Errata
(November 30, 2016)

4. Estimation

• p. 93, 138, 139, and 151 in Eqs. (4.105), (4.350), (4.351), and (4.389) it must read \( ... = \text{argmin} \) instead of \( ... = \text{argmax} \).

• p. 119, second paragraph. It should read: ‘Let us therefore assume that \( I \) reference values, collected in the vector \( y_r \), for …’

• p. 132, Fig. 4.11, line three of the heading: The text should read: ‘... with all points and a statistical test is applied to identify outliers, a …’

5. Homogeneous Representations of Points, Lines and Planes

• p. 212, 3rd line before Eq. (5.52): It should read: ‘... and we will generally not distinguish between them.’

6. Transformations

• p. 253, after (6.23): The text should read: ‘...we have the parameters \( c \) and \( f \) which cause the typical effects ...’.

14. Geometry and Orientation of the Image Triplet

• p. 640, Fig. 14.4: The point in the left image with projection centre \( O' \) should be \( x' \), not \( x'''' \).
